CARLETON CONDOMINIUM CORPORATION NO. 177

BY-LAW NO. 9

BE IT ENACTED as By-Law No. 9 (being a by-law to define standard units) of Carleton Condominium Corporation No. 177 (hereinafter referred to as the "Corporation") as follows:

**ARTICLE I  
DEFINITIONS**

All words used herein which are defined in the *Condominium Act, 1998*, or any successor, ("the Act") shall have ascribed to them the meanings set out in the Act as amended from time to time.

**ARTICLE II  
GENERAL**

- (1) The purpose of this by-law is to define the standard units in this condominium, in accordance with the requirements of the Act.
- (2) Where the materials or specifications set out in this by-law are uncertain or incomplete, the standard unit specifications and materials shall be consistent with "Builder's Standard" construction. In the case of any dispute as to what constitutes "Builder's Standard", a comparison shall be had to the quality of the particular feature being offered by builders of comparable construction at the time of the damage.
- (3) The standard unit does not include features, which are part of the common elements. The Corporation's declaration determines which features are part of the common elements and which features are part of the units. To the extent that the attached schedules include features which are part of the common elements, they are included for reference and information purposes. They are not intended to be part of the standard unit.
- (4) Except as otherwise indicated in this by-law, the standard unit(s) shall include all features of the units mentioned in the declaration or shown in the description of the condominium -- including Sheets 1 to 14 of Part 2 of the description. In the case of any inconsistency between the declaration or description and the schedules to this By-Law, the schedules to this By-Law shall prevail.
- (5) All materials and construction shall conform to the current Ontario Building Code, Ontario Fire Code, Ontario Electrical Safety Code, current Municipal regulations and by-laws, and all applicable bulletins in force. Where conflicting requirements exist, the most stringent shall apply. If any component of the standard unit must be upgraded or changed in order to comply with any applicable governmental regulation or code or other law applicable to the repair of insured damage or destruction, the said upgrade or change shall be considered part of the standard unit despite not being clearly defined herein as being part of the standard unit.
- (6) Where the schedules to this By-Law refer to specific brands of equipment or materials, this shall be deemed to include equivalent brands.
- (7) In this condominium, there are two (2) different classes of standard units. Each class is based upon a different model of unit in this condominium. The standard unit for each class or model is defined and described further in plans and specifications contained in the schedule(s) indicated for the particular class. The classes and schedule(s) are as follows:
